OFFERS

Dexon BPM, the platform: a business orchestration and automation platform. It models an organization's capabilities, services, offerings, processes, data and indicators, and executes them on one engine, with one repository and one audit trail. Dexon ServiceDesk: the ITSM platform built on Dexon BPM. Dexon Architect: the executable business architecture - a digital twin of an organization - built on Dexon BPM. Each product includes the platform; one licensing model for all three. The methodology is public: 102 pages, downloadable at dexon.us (methodology).
